Katrina,

I've attached the 2014 report that was done on the site. I believe the area you are referring to is labeled parcel 16 and is currently owned by Regina Henson as of the date of the report. The un-redacted parcel map is on page 16. Let me know if this is what you needed or if I'm totally off.

Lance, please help me understand the property ownership and operation for the northern portion of Lorraine.

I am interested in the areas north of Lorraine that include tank 70 and the orange rectangle identified as Former separation pond (see fig 3). The Sanborn maps do not show this area to be part of Lorraine, however, the sanborns are not full operational documentation either. The Ohio Sanborns and the property ownership maps for it are attached for reference. Neither of these incorporate this area.

I am interested to know who owned it and operated it. I think that I have seen this property referenced in some report or document, but just can't find it or pinpoint it. It may have been part of the title search that you did, but not certain.

Thanks for your help.
